

Appleyard & Trew were appointed Quantity Surveyor and CDM Co-ordinator to JAEGER for a fast track refurbishment of their Flagship store in Regent Street, London.

Appleyard & Trew developed and produced a series of detailed cost plans and options over an intense three-month design period. The board-approved scheme was a mix of "light touch refresh" and a fuller implementation of the new design concept fit out which meets Jaeger's design and cost aspirations.

During the three month design period, Appleyard & Trew also carried out a pre-qualifying and main contractor tender.

Works were carried out on a phased basis to keep as much of the store trading as possible during the refurbishment works. The first phase was well received by JAEGER, their customers and the wider press.
