

CASE STUDY

YORKSHIRE BUILDING SOCIETY

BRANCH REVITALISATION

In early 2013 Appleyard & Trew assisted with the successful design, procurement and delivery of the Concept Branch for approval by the Client.

Appleyard & Trew were appointed during 2013 to advise and procure a new framework for the branch network development, which included creating and tendering a new suite of framework documents and contracts. Working closely with the new Concept Architects, the new framework commenced the first projects on site in January 2014.

The framework is a comprehensive branch wide refurbishment programme and incorporates the new brand and customer services enhancements.

Within our cost control role, we carry out Quantity Surveying services for the Building Society branch development programme, from a light touch up to major flagship refurbishment.

The majority of works are carried out on a phased programme whilst branches remain fully operational.

PROJECT OVERVIEW

Client

Yorkshire Building Society Group

Architect

SoVibrant, A&Q

Project Value

Variable per site (approx. £70,000 - £500,000)

Appleyard & Trew's Role
